ALICIA BUELOW

Frontend Developer

+61 420 337 650 | alicia@buelow.com.au | aliciabuelow.dev | github.com/aliciabuelow

PROFILE

Frontend developer with a design-driven approach, building clean, responsive interfaces with React and JavaScript. Currently developing two custom business websites as a freelance developer, with hands-on experience in UI design, API integration, and client collaboration. Bringing a background in design and e-commerce, with a strong focus on creating intuitive user experiences.

SKILLS

Languages: JavaScript, HTML5, CSS3, Python (familiarity)
Frontend: React, Bootstrap
Backend/APIs: Node.js, Express, API Integration
Tools: Git, GitHub, Vercel, Render, npm
Design/UX: Figma, Adobe Photoshop, Adobe Illustrator, Responsive Design
Other: SEO, Google Analytics

PROJECTS

AI Travel Itinerary Builder
React | JavaScript | Node.js | Express | OpenAI API | CSS | Vite

- Built a full-stack AI travel planner that generates structured, day-by-day itineraries from user-defined inputs
- Engineered prompt structure to produce consistent, parseable AI responses for reliable frontend rendering
- Deployed frontend on Vercel and backend on Render, configuring environment variables and API communication

Project Tracker
React | JavaScript | CSS | Vite | localStorage

- Built a React-based project tracker with full CRUD functionality for managing projects and nested task lists
- Implemented structured state management and data flow across components, handled nested updates immutably ● Persisted user data using localStorage to maintain projects and tasks across sessions **Molly & Milly / E-Commerce Store**

Shopify | HTML | CSS | Adobe Photoshop & Illustrator | SEO

- Designed and launched a branded e-commerce store selling original artwork and digital designs
- Integrated third-party print-on-demand services to automate order processing and fulfillment
- Implemented SEO best practices, including metadata optimization and structured product listings ● Processed and fulfilled 150+ unique customer orders

WORK EXPERIENCE

Freelance Web Developer Remote
2026 - Present

- Designing and developing two custom engineering business websites using React, JavaScript, Vite, and CSS

- Building responsive, multi-page websites with reusable components and interactive UI elements
- Managing client communication, design direction, website content, and project planning independently

Molly & Milly Remote
Founder, Web Designer, Artist Apr 2020 - Jun 2025

- Designed and built a custom Shopify storefront, focusing on responsive design, digital branding, and UX
- Created original digital artwork and managed product listings, custom storefront, and print-on-demand services
- Handled customer orders and support, marketing, and social media

TD Bank London, Canada
Credit Specialist Jul 2016 - Jan 2018

- Analyzed customer credit profiles and financial data to recommend appropriate credit products and strategies
- Translated complex financial information into clear, layman-friendly explanations
- Consistently met and exceeded monthly sales and performance targets through consultative problem-solving
